## ELECTRONIC SECURITY ALARM

Reliable and basic system for protection of persons and property

VÍTKOVICE IT SOLUTIONS a.s. Company offers cutting-edge intrusion detection systems, which are, according to the new standard, also called alarm security and emergency systems. We provide this type of security for smaller and large buildings with different levels of risk. Our experts will create a comprehensive customized design that will fully meet your needs and requirements.

### WHAT DOES ELECTRONIC SECURITY ALARM MEAN?

Electrical security alarm (ESA) system alerts the operator of violation of the protected area. Generally, we distinguish between three layers of electric security: perimeter, skin, and space protection. Perimeter protection ensures the security of the entire complex after overcoming mechanical barrier systems, skin protection is used to detect attempted intrusion through doors or windows. Spatial protection is represented by motion detectors in the building. Electronic security alarm consists of a security control panel, controls for the activation and deactivation of the system, detectors and terminal equipment. If there is a violation of the guarded space, ESA will evaluate the situation and alert you. Information on detecting penetration of an unauthorized person is signalled acoustically by siren i.e. either locally or remotely, e.g. using radio or GSM module, or other transmission PCO device. Our company has a wide range of exchanges and detectors to meet the needs and requirements of the client. We use only proven technology manufacturers, which in conjunction with the work of our specialists leads to a high quality of service. Intrusion detection systems are offered as a standalone application or as part of other systems such as ACS, CCTV and perimeter protection.

## SPECIFICATIONS OF PRODUCTS AND SERVICES

- Security analysis
- Creating a comprehensive authorized security design even in stealth mode
- Delivery of equipment
- Installation, maintenance
- Programming and commissioning
- Integration with other security systems (ACS, EPS, CCTV)
- Checks and inspections
- Supply of equipment from reputable manufacturers (Honeywell, Texecom, Tecnoalarm, Siemens)

We carry out all the work in accordance with and in respect of the legislative framework and code of standards.
