## SECUSCAN | THE UNDERCARRIAGE MONITORING SYSTEM

### Advanced technology for car recognition

With its innovative technology, the system supports fast and easy detection of dangerous objects as, for instance, weapons and explosives, drugs and contraband as well as safety or quality defects (e.g. rust). In contrast to conventional vehicle underside control methods, like hand-held mirrors or inspection wells, SecuScan facilitates reliable safety inspections without slowing down the flow of traffic at the access point.

- Available in color and in monochrome
- Extreme high resolution
- View of the full undercarriages incl. door sills
- Network capability for data Exchange between several systems or for integration in central control software

### Mobile installation

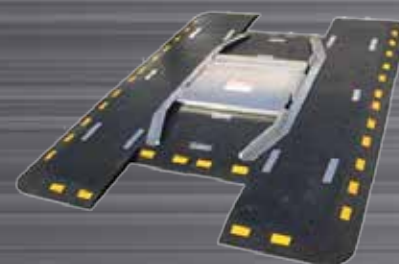

- For flexible safety controls at changing inspection sites
- Fast assembly and disassembly (cca 30 min.) as well as uncomplicated transport
- For all vehicle weight classes and track widths
- Available with light aluminum ramps or with very robust rubber pads

### Use scenarios (sale)

- Protection of governmental buildings, airports, military institutions, embassies, nuclear power plants, penitentiaries as well as other high-profile installations
- Border control

### Use scenarios (rental)

- Safety inspection during large scale sporting or other events.
- Police mobile inspections
